

PTFS is a leading provider of comprehensive enterprise content management solutions that include: content management software, digitization and content conversion services, systems integration, and professional support services. PTFS has more than 250 satisfied government, commercial, academic, union, and association clients.

ArchivalWare

ENTERPRISE CONTENT MANAGEMENT

The PTFS ArchivalWare™ software provides content management and complex searching across enterprise content within an easy-to-use Web interface. ArchivalWare™ allows users to accurately search, retrieve, and manage any digital object (including archived full-text materials) using content text, meta-data fields, or a combination of both to find information quickly and with pinpoint accuracy.

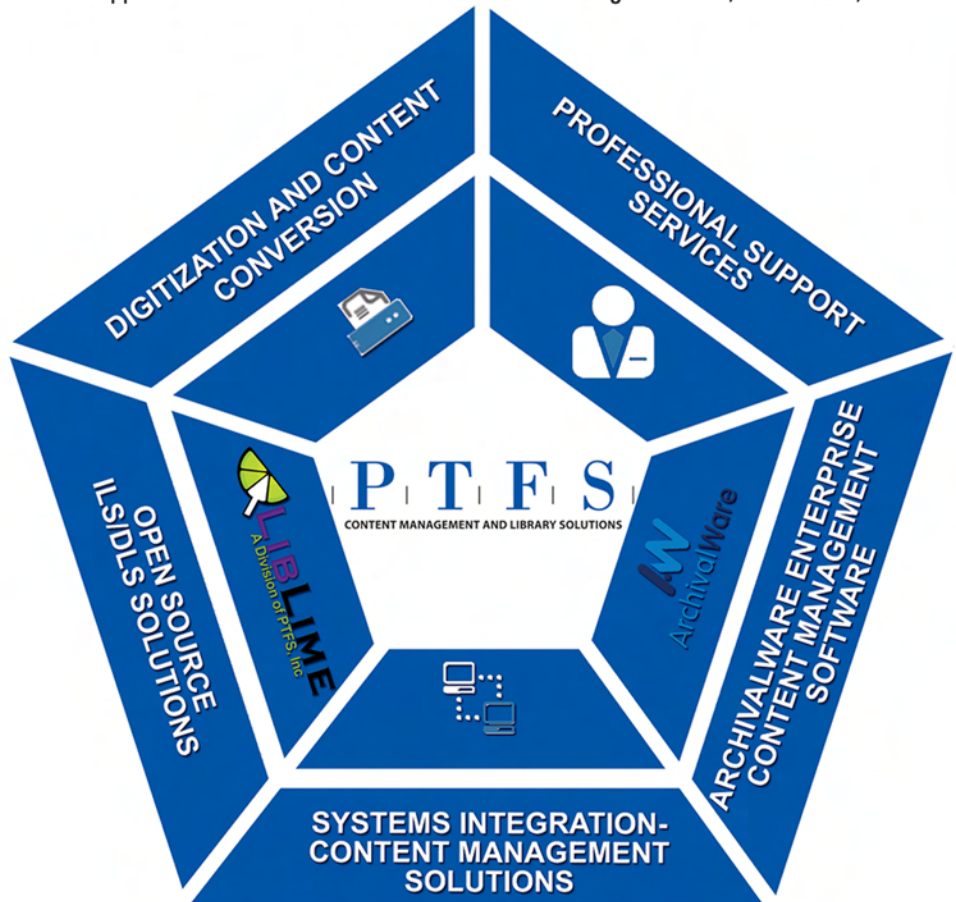

LibLime, a division of PTFS, provides Integrated Library Systems (ILS) implementation and services including: installation (OS, RDBMS, Web Server and Koha); software feature development (new feature functionality and enhancement of existing features); configuration (system parameters and module permissions); data migration (bibliographic, item/copy, authority, user, and current circulation transactions); training (staff functions and system administration); annual support (maintenance and/or complete system hosting). Koha is a full featured Open Source Integrated Library System. As free software under the GNU license, organizations are free to modify the product and adapt it to any workflow management needs.

DIGITIZATION AND CONTENT CONVERSION

PTFS offers specialty, classified, and high volume digitization and content conversion services at cost effective pricing. Our 10,000 sq ft conversion service center provides a full range of services that include: digitization, metadata creation, and re-keying services. Content ranges from published, unpublished, digital, non-digital, rare, fragile or historic documents. Material formats include:

- Engineering Drawings
- Books
- 16MM/35MM Microfilm
- Microfiche
- Photographs/Slides
- Video/Audio

PROFESSIONAL SUPPORT SERVICES

For nearly 15 years, PTFS has provided professional and support services to all types and sizes of libraries and corporate information resource centers. PTFS support services range from total information resource center management to individual, long-term positions. PTFS staff is composed of highly qualified information specialists as well as technology professionals (e.g. systems administrators, programmers, web designers and developers).

SYSTEMS INTEGRATION - CONTENT MANAGEMENT SOLUTIONS

PTFS provides integrated library and business process/workflow systems, consulting services and portal solutions. Services include requirements analysis, software selection, business process re-engineering, hardware and software installation, training, support and maintenance. Our team of experts deliver Integrated Library Systems (ILS) comparative analysis/consulting, systems migration planning, data conversion planning and ILS support.
